

T-Tab is part of the TAB acoustical ceiling tile collection. The product ships flat and like the daggerboard of a sailboat, slides gracefully into the slot of the product creating a three dimensional tile which is available in multiple heights. The material and shape provide effective acoustics and pleasing aesthetics.

Drop the tiles into any 9/16" or 15/16" tee-grid. Simply by changing their orientation in the grid, you can create an unlimited variety of patterns.

Installation / Maintenance

Configure each tile according to the illustrations below. Insert the finished tiles into the tee grid.

To remove dust or air-borne particulate matter, simply vacuum the tiles or use compressed air. For deeper cleaning of stains, use a clean cloth or sponge with a non-solvent base solution of carpet shampoo always making sure to follow the manufacturer's instructions. Starting from the outside of the stain work in a circular motion towards the center which should avoid spreading the stain. Afterwards, use a clean sponge or cloth with clean warm water to remove excess moisture. Allow to dry, then brush the area gently with a soft brush if needed.

The treatments listed above are intended as general guidance only. FACT design takes no responsibility for any damage that may occur from the execution of the treatment listed above.
