

OWA USA product comparison guide

OWAlifetime mineral fiber collection

OWA

OWA USA product comparison guide

At OWA USA, we strive to provide all our customers with the necessary tools to succeed in the market. The OWA USA Product Comparison Guide is just one of the services we are proud to present to achieve this goal. This guide can be used to reference the technical details of another manufacturer's ceiling tiles and locate the equivalent OWA USA product within our OWAlifetime mineral fiber collection.

It is important to note that this guide serves as a best suggestion, based on similar physical attributes and acoustical performances between OWA USA products and those of other manufacturers. Every project has specific needs and requirements that should be looked at prior to choosing a solution. OWA USA recommends identifying the type of environment (educational, healthcare, office and administration, open space, etc.), the acoustical needs (such as NRC and/or CAC levels) of said

environment, as well as the ambiance and aesthetics desired by the end user. It is always best practice to refer to the technical data sheets of both OWA USA and other manufacturers when making a final decision. We here at OWA are happy to provide our knowledge and expertise throughout the project evaluation process.

In addition to the premium-grade OWAlifetime acoustical tiles you will find within this guide, we are excited to introduce cutting-edge technology to the market with our OWAconsult collection. Our OWAconsult line offers a wide range of beautiful design options coupled with the excellent functionality you will find with all our products, resulting in perfect solutions for enclosed areas as well as open-space environments. For more information, please visit our website at <http://www.owa-ceilings.com>.

For over 70 years, our OWA ceiling solutions have been providing a premium service for all our customers across the globe.

All OWA ceiling tiles are produced using our quality-grade, virgin wool technology, each being designed specifically with ceiling solutions in mind. This results in a premium-grade product that delivers an easy, comfortable installation.

In addition to providing a product that installs smoothly, we at OWA understand the need to create the perfect atmosphere for every facility need. Our ceiling systems furnish clean and clearly defined room acoustics for any environment, resulting in a pleasant, productive and comfortable setting. From small office spaces, classrooms and hospital rooms all the way to large, open-space layouts, we are proud to offer a premium solution.

Whether simple and restrained or expressively distinctive, our constantly developing product ranges provide the right solution for every undertaking.
